Performance*

ADDED STRENGTH, RIGIDITY
AND THERMAL CONTROL

T rueComfort's laminated custom-contoured foam provides strength and rigidity. The rigid foam insulation helps reduce

heating and cooling costs and also serves as a barrier to sound infiltration.

Increased R-Value

The TrueComfort thermal envelope protects your home from heat and cold, blocking wind and weather.

When TrueComfort is applied to your home, the R-value of exterior walls increases by as much as 22 percent – providing a dramatic enhancement in thermal control.

Impact Resistance

TrueComfort siding is reinforced with a custom-contoured rigid foam insulation that provides strength and rigidity for outstanding impact resistance – five times better than traditional hollow siding. It compensates for minor variations in the wall.

Quieter Interiors

TrueComfort helps block sound – reducing exterior noise and enhancing interior acoustics – so you can enjoy the peace of a quieter home.

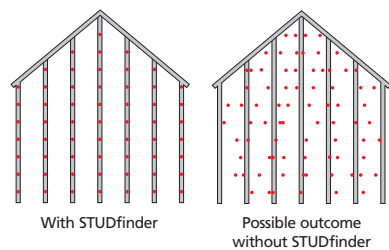

The STUDfinder™ **PATENTED** Installation System

In both remodeling and new construction, achieving a high-quality siding installation comes down to basics. For optimum performance, panels should be accurately and securely fastened to studs, and TrueComfort with STUDfinder makes it easy to do just that.

Protection Against Hidden Dangers

You can choose the TrueComfort STUDfinder installation system with confidence, knowing it can help ensure the siding will be applied correctly.

Precise installation contributes to wind load performance, and helps avoid nailing into anything located between the studs, like plumbing or wiring that could create a number of dangers...

Accuracy and Quality

STUDfinder is engineered to align nail slots precisely with construction standards of 16" and 24" on center, with indicator letters centered under each nail slot to make it easy to locate studs and help ensure accuracy.

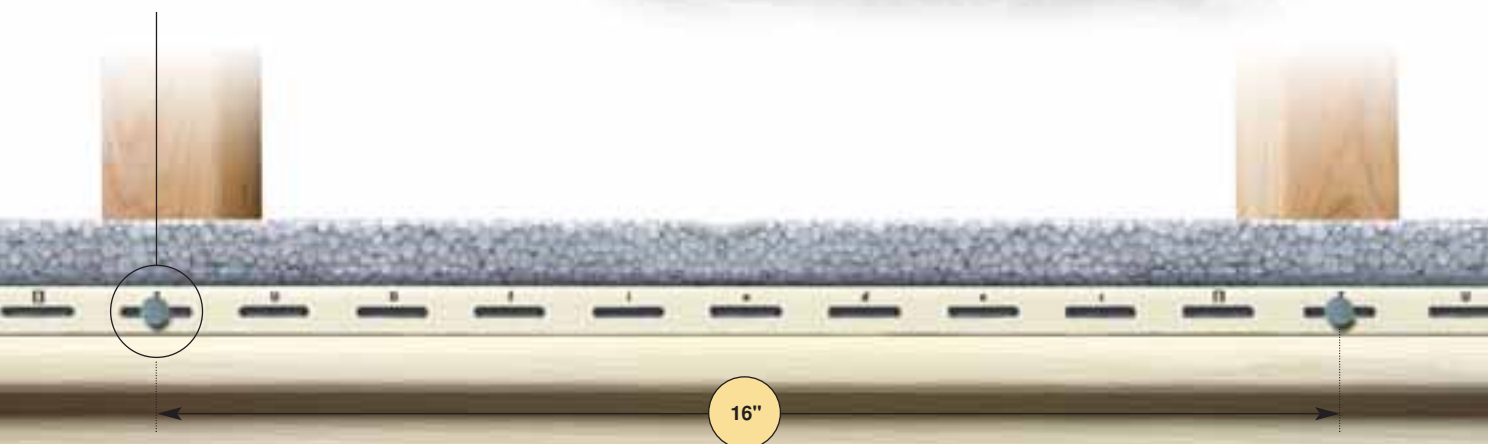

Precisely spaced nail slots and indicator letters are designed to help locate solid framing and help ensure accurate and secure installation.

DuraLock™

DuraLock features an oversized rigid tear-drop shape which is substantially larger than many competitors' locks, providing secure installation.

The angular locking leg creates a secure, snap-fit installation, allowing for necessary expansion and contraction.

Beauty*

Siding: TrueComfort double 6" Cedar Board in savannah wicker.
Trim: 3-1/2" Lineals and Traditional SuperCorners in colonial white.

DOUBLE 6" CEDAR BOARD
PROVIDES THE NATURAL LOOK
OF WIDE BOARD WOOD SIDING.

**Double 6"
Cedar Board
Features:**

**Natural rough cedar
texture molded from
real cedar boards**

Straight Even Face
with a flat surface for
the look of wide board
wood siding.

**Deep 3/4"
Straight-Edge
Panel Projection**
for the clean look of
newly-sawn wood.

**Custom
Contoured
Foam**
increases R-value and
provides added strength
and rigidity for a solid
look and feel.

Double 6" Cedar Board siding features a grain molded from real cedar boards for a natural wood texture. Its deep 3/4" panel projection with a 90° straight-edge provides dramatic shadow lines.
